Abstract

This paper aims to improve the coach situation and the player, and to see the succeeded work that relied on the sport management by inserting the total quality requirements in training. All that will increase the production of Iraqi team player in Karate.

Key words: Karate, total quality, coach, player, incentives, administrator

Introduction

Any successful work is relying greatly on the sport management. If we inserted the total quality requirements in training, this will increase the Iraqi team players production.

1- Model's name

A proposed model to the requirements of applying the total quality in Training The Iraqi team in Karate.

2-Model's Goal

The model aims to achieve the administrative distinction, and apply all the total quality requirements in training the Iraqi team players in Karate.

3-The beneficiary of the model

Iraqi Karate Federation

4-The steps that have followed to reach the program

-Personal interview

-Questionnaire

-Books and References

5-The results and conclusions recommended by the Researcher

The results of the study should be followed and applied by the cadre in charge at the Iraqi Karate Federation and the coaches in training the Iraqi team players of Karate by and apply this proposed project.

6-The proposed model

Presenting the design of proposed model of total quality to the training programs of the Iraqi team players in Karate, that include:

6-1The first theme

Apprehension and satisfaction level by the supreme administration to the total quality concept in training programs for the Iraqi team in Karate.

6-2-The second theme

The understanding of the beneficiaries needs and their expectations (coach – player – Administrator) in Karate, and how to fill them by the supreme administration.

6-3- The third Theme

Considering the training program quality through planning processes (programs – Capabilities –Fund) to change the income to outcome.

6-4 The fourth Theme

The coaches understanding level to the basic and scientific training level, and how to Implement them in training programs for the Iraqi team in Karate.

6-5 The fifth Theme

The training programs quality by measuring and evaluating processes (Pre- during- post training program) to develop and improve the National team players in Karate continuously.

6-6 The sixth Theme

The applicability extent and using the Human Resources, Material Resources and information in training programs of the Iraqi team in Karate.

6-7 The seventh Theme

Training programs funding plans and the ability to market championships and competitions as one of the funding resources to the Iraqi team in Karate.

6-8- The Eighth Theme

Utilizing the moral and tangible motivation to attract beneficiaries (player – coach – administrator).

7- Proposed model application

In order to apply the proposed model, the results of questionnaire themes should be followed as hereunder:

7-1 The supreme administration apprehension and convincing with total quality requirements in training process in Karate.

8-The total Quality features

The total quality achieves all the agreed requirements to obtain the players satisfaction. It is the distinctive degree. The total quality tries to put all things in the right and correct way. Also, it refers to the needs correspondence, and the requirements level that should be achieved by the institutions.

8-1 Total quality application in training program

The total quality application in training program achieves the following concepts:

- Fill the Beneficiaries needs and desires (player – coach-administrator) in Karate.
- Eliminate errors and squeeze wasting.
- Implementing an integral system for continuous improvement and development.
- Utilizing Information Technology.
- It saves time, effort and cost.
- It strength with continuous development to the general goals, organizational structure, procedures and programs.

8-2 Necessity of change at the Union

The supreme administration and all beneficiaries at the Union have to believe in change. The positive direction will be helpful and lead to a successful training process. In addition, planning, instructing and observing is the supreme administration and those in charge of training responsibility. Also, the supreme administration has to follow the procedures , issuing legislatives and presenting help. The supreme administration has to be aware of all beneficiaries to fill their needs, desires and expectations (player- coach- administrator) in Karate.

9- The Administrator

One of the important tools in this paper is the administrator. So, the free selection of best alternatives to manage the responsibilities. He is able to manage and coordinate among the supreme administration and the requirements. He is responsible also to provide the players records to catch and observe the players medical situation, physiological and Function Efficiency and progress rate. He has to be free in supervision and monitoring the tools and devices. And the best important thing is to be free in making decisions and supporting him to implement them.

10-The Coach

He has to contribute at the planning operations and determine the procedure and policies. The availability of facilities and using the Technology in teaching and training. Providing the coach with all potentials to do measures and evaluation in preparing period, pre-competition and post-competition.

11-The player

The player has to be fill with all selection requirements. He has to present the best level of functional efficiency and health fitness. The player's history should be safe and secured . Motivation principle must applied to raise the players performance in Karate. The supreme administration and the coach shall be in contact .

12-Training operation quality through planning, program, potential and fund to change the income to out come

In order to succeed the quality in training, many goals have to be set through training plans. The plans should flexible, changeable and can be amended . Setting the training plan that includes the daily training schedule, weekly training schedule, number of games, championships and competitions during the season. The aid resources in teaching and training should truly focus technology and technical devices (prints, map boards- matches videos to the same level). In addition to what has mentioned, commitment of long and short term plans. Those in charge of training should be specified with their specialization. Confirming the players number at the National team and recognizing their performance level. Determine the specialization of those in charge of training operations. The most important thing in this point is providing the

qualified and specialized persons who are able to do planning operations. The budget must be set, and looking for additional fund. We have to remember that cooperation between those who in charge of planning operations and executing the training. Finally, determine the quantity and the number of required devices and their sufficiency to the training.

13-Training Quality level through measurement and Evaluation Pr-during-Post the training to improve and develop continuously the performance level of National team players in Karat

13-1 Training quality level

This point includes the selection of National team players regarding the criteria and practical basics .Using all the evaluation types to asses all the sides of the player periodically .The selection of best evaluation is required pr- training, during-training and post-training.All the measurements procedures should be considered such as: physiological, Anthropometric, physical tests, skills test and psychological tests. The full Knowledge of evaluation and measurement procedures. After completing the training, it should followed by analyzing the evaluation and measurements results, and assessing the final results. It is very important to determine the goals of measurement process. The measurements and tests are required periodically to follow the progress averages.

14-The extent of utilizing Human and Material Resources and Information technology in Training Iraqi National team in Karate

First, all the material and Human resources should be available to execute training. The budget for tool and devices maintenance should be available. The potentials should achieve the determined targets. The material resources should be available such as the training halls and Karate training tools.

15-Setting up a mechanism to use potential

All the available potential should be according to the determined budget. All the training, competitions and championships should be hold at legal and standard stadiums.

16-Material potential availability

All the standard features should be available in the selected players. The technical team should be qualified, and the availability of information technology, data base and monitoring the information system.

17-The utilize of training fund, and the possibility to market championships and competitions as one of the funding Resources to the National team in Karate.

17-1 Training funding Resources

All the received funding resources should be spent regarding the Islamic Law. Collecting all the revenues from the sport marketing, ceremonies and championships. Get benefit from the interests of deposits, contributions, donation and gifts.

18- Marketing to Championships and Competitions

All the advertisement and accouchement rights should be preserved , and using the sport channels. The ability of making T.V marketing by signing a special T.V contracts, and marketing for championships and carnivals. Even the services marketing to the audience can be made locally and abroad.

19-Material and Moral motivation as a tools of attraction to the beneficiaries (Player- Coach- Administrator)

The material and moral concept motivation is important to raise the players performance, regarding individual differences to play with abroad players to increase motivation, distinction and incentives. We have not to forget the timing of incentives. Also, the flexibility in giving bonus (changing the criteria of giving incentives) to do many tries. The previous incentives to the beneficiaries (Player – Coach – Administrator) are related to the effort, performance , achievement and expected results. The incentives have to be proper to the beneficiaries motivation (Player-Coach- Administrator). The reason behind giving symbolic incentives is to strength beneficiaries distinctive behavior and the real tries to make the achievements (Medals – Certificates. Finally regarding the individual difference in giving incentives.

Conclusion

1-Achieving the administrative distinction.

2-Applying the total quality in training the Iraqi team players in Karate.
